AXENT.ONE

The ultimate

SHOWER TOILET

Iconic bathroom

DESIGN

The multiple award-winning design of AXENT.ONE is now even more transcendent. With its elegantly curved lines and seamless surface, it is as much a design item as a functional object.

This remarkable toilet was created by architects and designers Matteo Thun and Antonio Rodriguez, and fits perfectly into any bathroom.

Stylish hygiene meets state-of-the-art

CONTROLS

AXENT.ONE turns functionality into user comfort. With the easy-to-use magnetic remote control, you can operate all of AXENT.ONE's exceptional features. The AXENT.ONE control system is all about ease. All functions and positions can be adjusted with just a small twist using one hand.

Thanks to the AXENT Smart Control app you can keep in touch with your AXENT.ONE shower toilet – without touching it. All functions can be controlled via Bluetooth from a clear and intuitive menu. Save your preferred settings or customise the basic functions to suit your needs. The AXENT Smart Control app is available for iOS and Android.

One design – a range of different

FUNCTIONS

AXENT.ONE and AXENT.ONE^{PLUS} combine timeless elegance, state-of-the-art technology and the finest craftsmanship with a range of exceptional features. Functions such as shower jet intensity, water temperature and the rear and lady wash settings can be easily controlled and adjusted using the remote control.

AXENT.ONE^{PLUS} takes toilets to a new level. It has numerous additional functions that turn any bathroom into your very own home spa.

MASSAGE FUNCTIONS

The oscillating and/or pulsating shower jet with rear and lady wash settings offers a thorough clean with a soothing, gentle spray. Position and water temperature can be easily adjusted.

DEODORISER

The automatic deodoriser is activated as soon as the sensor in the shower toilet seat detects that you are seated. Thanks to the latest diatomite filtration technology, the deodoriser neutralises odours rapidly, enhancing your experience and improving your overall wellbeing.

SEAT HEATING

For maximum comfort in all seasons, the seat includes adjustable heating that can be adapted to your individual needs. The intelligent ECO mode saves electricity and learns from your daily habits.

WARM AIR DRYER

You can use the remote control or app to set the temperature of the warm air dryer. The gentle airflow across your skin gives you a clean, fresh and dry feeling.

A triumph of modern

HYGIENE

With shower toilets, it's all about the nozzle. And AXENT.ONE excels here, too: its stainless-steel surface has an antibacterial effect, it is perfectly positioned above the ceramic bowl and it offers the highest standards of hygiene and functionality. The nozzle is rinsed with fresh water before and after every use. For a healthy, hygienic and hassle-free wash experience.

The oscillating shower jet with rear wash and lady wash settings offers a soothing and thorough clean. The temperature and intensity of the spray can easily be adjusted.

Redefining contemporary

WATER DYNAMICS

AXENT.ONE has the perfect solution to dealing with dirt, toilet paper and urine – using what is probably the world's most powerful water vortex. The accelerated centrifugal force whisks all waste material away, swiftly and reliably, leaving nothing behind but a sparkling clean toilet.

The injection water outlet positioned at the side of the bowl propels water at maximum speed and accuracy to create precise, splash-free flushing momentum. The system also uses less water than conventional toilets.

Nothing to hear

HERE

A toilet flushing can be as loud as a vacuum cleaner. Unless it's an AXENT.Infinity toilet. The powerful water vortex rinses out the whole toilet bowl at a noise level that's lower than conversational speech. Sounds good, doesn't it?

Maximum decibel level of flush noise

The new standard in protective COATINGS

AXENT.Infinity Guard ensures ultimate protection for your toilet against germs and bacteria. This special ceramic glaze contains silver ions, which reduce microbial growth to an absolute minimum. The bowl, toilet seat and lid all boast excellent antibacterial properties and reduce bacterial load by up to 99.9%. The bowl is also coated with AXENT Easy Clean to make cleaning a cinch.

Leaner means

CLEANER

It's quite simple, really: if there's no rim, then there's nowhere for limescale and bacteria to hide. That's why AXENT.Infinity doesn't have an inner rim. As a result, the toilet is easier to clean and therefore more hygienic than conventional models. The powerful AXENT.Infinity Flush rinses the whole bowl swiftly and effectively. Bacteria and limescale won't even get a look-in. This clever design means all you need is a cloth to keep your toilet clean. And because you'll be using fewer cleaning products, you'll be helping the environment, too.

Everything rests on

THIS

Soft-closing mechanism, quick-release technology and an antibacterial coating: even the AXENT seat and lid are highly innovative. If necessary, the seat-and-lid unit can be easily removed and attached again.

The soft-closing mechanism means no loud bangs – for which your entire household will be thankful.
